

Want to thank everyone who showed up and worked hard to get a lot of things done.

The landsite has developed an issue with the walk-in cooler compressor -- and thanks a lot for LvLPwA Charities donation of \$ 2000.00 going to the repairs - TCC will be able to expedite the process of getting cooler ready for all campers that come out to enjoy the landsite.

There was a situation brought up with concern about the fire-pit - not being 'attended' or extinguished after most of the people here for the weekend have left the landsite --which Stan and I had already discussed before.  
Just a reminder to everyone that enjoys TCC -- to check - - and double check that the person who says they are taking care of the fire-pit -- DOES IT.

The water erosion problem as you enter the landsite will be taken care of as soon as possible --  
also thanks to several donations given to TCC during this meeting.

There is also a 'ROAD' fund -- also started with donations - for various area use at the campsite.  
Some work has already been done -- but there is more work on the roads needed.  
Donations for this need to be made specifically to the ROAD fund.

The Compound fence that has been up for several years was discussed also - and there is a fund set-up for donations to install a new fence.

WE all enjoy coming out to the landsite - as well as seeing old friends - or making new ones.  
It takes a lot of people to help with all sorts of a variety of things to keep TCC the great place it has become.

Slowly - but surely TCC landsite will keep getting better and better for everyone to continue to enjoy.

Thanks,

Keith Moses  
Land Mgmt Coordinator
