

To ToL

I wish to make something clear to ToL, as myself. I do not have any problems with the past ToL requests per say. There is a reason behind my votes and comments as a LM Representative.

Since I bought my trailer I have made LM requests. I have had to follow many rules or procedures that are either unwritten or have not been voted on by the Conference.

As a coincident you are making request about 3 - 6 months behind the ones I have made. They are almost identical request. This has been going on for about 18 months now.

When I requested a place for my trailer and I had to follow these unwritten or unapproved rules / procedures. A few months later James bought Ray's trailer. I felt they should follow the same rules / procedures that I had to follow. Others felt they should not have to follow them. I did not feel this was fare and I spoke up.

There are still unwritten or unapproved rules / procedures that I have been dealing with over the months. I make a request and I am told no.

I do as you do and keep trying to get it passed. It does not pass. Shortly after that you present an almost identical request. I end up basing my decision on these unwritten and unapproved rules and procedures that I had to follow.

So when your requests are submitted I go with what I was required to follow. I may feel these rules / procedures may not be right, but that we should all follow them equally.

I never ask someone else to do something I myself would not do. I am following these rules and ask that you also follow them.

I am not upset with ToL. I am upset with the way these unwritten or unapproved rules and procedures are unjustly swayed either for or against the request depending on who submits the request.
